

Regional Ecosystem Protection Network (REPN)

Doug Johnson
Coordinator, Regional Ecosystem Protection Network
U.S. EPA, Region 8
(303) 312-6834
johnson.douglas@epa.gov

Key Words: ecosystem, assessments, indicators, geo-spatial tools, and network

The REPN poster highlights the coalition of EPA Regional and Headquarters staff and managers dedicated to ecosystem protection through the sharing of ideas about ecosystem assessments, innovative management, and geo-spatial tool development and applications.

The Network champions the integration of ecological and biological indicators into EPA program and partner decision-making processes, in support of the Agency's mission to protect human health and the environment and for the long term success of ecosystem protection efforts. The poster describes the REPN's Mission, Vision, Goals, and a few example assessment activities that some of the REPN members are vested in, e.g., the R5 Critical Ecosystems Team Analysis-Lake Michigan Basin.
